

Specially cultivated in Israel, they contain high concentrations of 2 types of colorless carotenoids. **Phytoene** and **Phytofluene**, along with  $\xi$ -**Carotene** – targeted at controlling pigmentation by inhibition of melanin synthesis, without coloring the skin.

- ✧ Boost the skin's natural ability to protect from the sun's damaging UV rays
- ✧ Protect against free radical damage caused by environmental aggressors
- ✧ Anti-inflammatory properties against wounds and UV damage
- ✧ Inhibit melanin synthesis to prevent pigmentation spots from forming
- ✧ Ability to treat melasma internally and externally present in the cells including dark acne scars, freckles, dark underarms and age spots

To increase the efficacy, **L-Cysteine** is added to maintain the structure of proteins in the body, forming collagen and boost the liver's production of **Glutathione** – often referred to as the body's master antioxidant.

Made-to-order chocolate-flavored tomatoes wrapped in marzipan

It is recommended to take one pill per day (equivalent to 2 specially-cultivated tomatoes) for a continuous span of 60 days to achieve consistent good results. Going at S\$169 for a box of 30 caplets
